THE ADMISSION PROCESS FOR INTERNATIONAL MASTER'S PROGRAM "METALLURGICAL ENGINEERING"

The prerequisite for admission to the Metallurgical Engineering master's program is a bachelor's degree or at least a degree of the same higher educational level at a recognized domestic or foreign post-secondary educational institution. In any case, a Bachelor's degree from the Technical University of Leoben (Montanuniversität Leoben) and a Bachelor's degree in natural sciences or engineering disciplines are eligible. Our master's education requires prior academic education in mathematics, physics, and chemistry. Knowledge of computer science in general and programming is helpful. In any case, proof of the general university entrance qualification is deemed to have been provided by proving this admission requirement. Metallurgical Engineering is an international study program; all courses will be held in English.

Study Admission Process

Students from third countries and the EU

Third-country citizens have to apply for admission using the documents listed below. Make sure to upload all the required documents fully diplomatically legalized and translated to English or German (if the originals are not yet in English or German). Please apply online via pre-registration under https://online.unileoben.ac.at/mu_online/wbselbstregperson.register. To legalize your documents, please contact the Austrian representative authority in your country.

Please find out in advance exactly how the documents have to be certified. It is essential to know that legalizing your documents can often take several months, so you should plan enough time for this. Please note that incorrectly legalized documents will slow down the admission process, and therefore, you may not be admitted to the desired semester.

National students

National students who acquired their school and university education in Austria can pre-register online before coming directly to the Study Support Center for enrollment. No separate document check is required.

https://online.unileoben.ac.at/mu_online/wbselbstregperson.register.

so that we can guide you through the application process as best as possible!

What You Need to Know About the Admission Process

Suppose you want to apply for the international Master's program "Metallurgical Engineering" at the Technical University of Leoben (Montanuniversität Leoben). In that case, you'll need to go through a multi-step admission process – unless you:

- You hold a Bachelor's or Diploma degree from the Technical University of Leoben or
- You were previously enrolled in a regular Master's program at the Technical University of Leoben.

The Admission Process consists of 3 Steps:

Proof of Prior Education: Your Bachelor's degree will be reviewed (you need at least 150 ECTS or a completed degree, and English skills at B2 level or higher).

Motivation Video: A video of max. 5 minutes, in English. Explain why you want to study this program and what your goals are (you will need to upload it as part of the online registration process).

<https://www.unileoben.ac.at/starter/en/studying/prospective-students/admission/pre-registration>).

Interview: If you pass the first two steps successfully, you will be invited for a 30-minute interview in English (online or in-person) with a commission of Professors in different metallurgical disciplines. Topics include your CV, academic background, and motivation.

Fee

The registration fee only needs to be paid by those students who are required to participate in the admission procedure.

There is a **70 € processing fee** – if you don't pay it on time, you can't participate.
